## **RESTRICTION INTO GROUPS**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 6-12, 14, and 16-26, drawn to a metal chelates wherein L and L' are independently selected from those encompassed by the formula of claim 4, classified in class 534, subclass 10+.
  - II. Claims 1-3, 5, 7-13, and 16-26, drawn to metal chelates wherein L and L' are independently select from formula B as set forth in claim 5, classified in class 534, subclass 10+.
  - III. Claims 1-3, 5, 7-13, and 16-26, drawn to metal chelates wherein L and L' are independently selected from formula C as set forth in claim 5, classified in class 534, subclass 10+.
  - IV. Claims 1-3, 5, 7-13, and 16-26, drawn to metal chelates wherein L and L' are independently selected from formula D as set forth in claim 6, classified in class 534, subclass 10+.
  - V. Claims 1-3, 5, 7-13, and 16-26, drawn to metal chelates wherein L and L' are independently selected from formula D' as set forth in claim 6, classified in class 534, subclass 10+.
  - VI. Claim 27, drawn to compositions comprising a metal chelate, excipient, buffer, and acidic and/or basic solution, and water as set forth in independent claim 27, classified in class 534, subclass 15.

- VII. Claims 1-3, 5, 7-13, and 16-26, drawn to metal chelates wherein L and L' are not encompassed by Groups I-VII above, classified in class 534, subclass 10+.
- VIII. Claims 28-31 and 33-46, drawn to a method of diagnostic imaging wherein metal chelates wherein L and L' are independently selected from those encompassed by the formula of claim 31 are utilized, classified in class 534, subclass 10+.
- IX. Claims 28-30, 32, and 34-46, drawn to a method of diagnostic imaging wherein metal chelates wherein L and L' are independently select from formula B as set forth in claim 32 are utilized, classified in class 534, subclass 10+.
- X. Claims 28-30, 32, and 34-46, drawn to method of diagnostic imaging wherein metal chelates wherein L and L' are independently selected from formula C as set forth in claim 32 are utilized, classified in class 534, subclass 10+.
- XI. Claims 28-30, 32, and 34-46, drawn to method of diagnostic imaging wherein metal chelates wherein L and L' are independently selected from formula D as set forth in claim 33 are utilized, classified in class 534, subclass 10+.
- XII. Claims 28-30, 32, and 34-46, drawn to method of diagnostic imaging wherein metal chelates wherein L and L' are independently selected from

formula D' as set forth in claim 33 are utilized, classified in class 534, subclass 10+.

- XIII. Claims 28-30, 32, and 34-46, drawn to method of diagnostic imaging wherein metal chelates wherein L and L' are not those encompassed by Groups VIII-XII above, classified in class 534, subclass 10+.

**Note:** Claims appearing in more than one group will only be examined to the extent that they read on the elected invention.

2. The inventions are distinct, each from the other because of the following reasons: Inventions (I & VIII), (II & IX), (III & X), (IV & XI), (V & XII), (VI & XIII), and (VII & XIII) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the products may be used for diagnostic imaging as well as for therapeutic purposes depending upon the metal ion attached.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

#### REJOINDER PARAGRAPH

4. The Examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain

dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

### **ELECTION OF SPECIES**

5. Claims 1-46 are generic to a plurality of disclosed patentably distinct species comprising metal chelate which may have L or L' independently selected from the formula of claim 4 or formula B, C, D, and D'. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

**Note:** Applicant is respectfully requested to elect a single disclosed species from within the elected group above. The elected species should include all variables associated with the elected species (i.e., the metal, X, X', n, m, V, etc.). In addition, Applicant is respectfully requested to state which claims read on the elected species.

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1618

7. Due to the complexity of the restriction requirement, a telephone call was not made to request an oral election to the above restriction requirement.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (571) 272-0617. The examiner can normally be reached on Mon.-Fri., 6:45 a.m. - 3:15 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hartley can be reached on (571) 272-0616. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
